

REMARKS

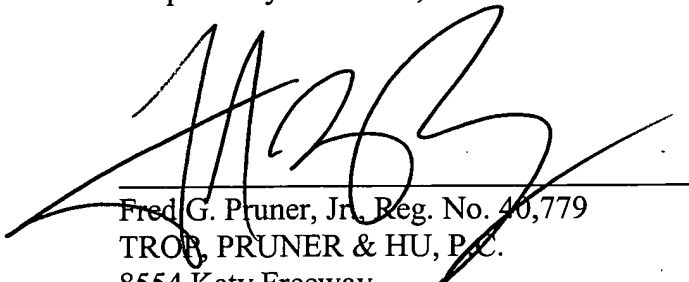

In an Office Action mailed on March 10, 2005, claims 22-34 were rejected under 35 U.S.C. § 112, second paragraph as being indefinite.

For purposes of overcoming the § 112 rejections, independent claims 22 and 29 have been amended, and dependent claims 23 and 30 have been cancelled. The language relating to the distances from the groove have been removed in independent claims 22 and 29, thereby overcoming the corresponding objection to this language by the Examiner. Furthermore, as now recited, the tray includes a longitudinal groove that is defined between first and second longitudinally-extending edges of the tray. As an example of a possible embodiment, Fig. 1 depicts a tray 11 that, as depicted in Fig. 1, includes a longitudinally-extending groove that extends between sections 18 and 19 which may be considered the first and second longitudinally-extending edges for this particular embodiment of the invention. Furthermore, as can be seen from Fig. 1, when a cable is inserted through the notch 23 (as an example), the cable extends in a substantially orthogonal direction to the direction through which the cable extends when inserted through the notch 22 (as an example). Additionally, as depicted in Fig. 1, the groove has a substantially uniform cross-section. It is noted that the tray that is depicted in Fig. 1 is one out of many possible embodiments of the invention, and Applicant is merely using the tray depicted in Fig. 1 for purposes of explaining the features of the claims. Thus, many other embodiments are possible and are within the scope of the claims.

Applicant submits that with the changes to the claims, the § 112 rejections have been overcome. The Commissioner is authorized to charge any additional fees or credit any overpayment to Deposit Account No. 20-1504 (MCT.0107-00US).

Respectfully submitted,

Date: June 10, 2005
